

Roland DGA and CIMsystem to Offer CAD/CAM Training for Dental Labs

Posted on November 7, 2012

Irvine, Calif., Nov. 5, 2012—Roland DGA and CIMsystem, a leading 3D and dental market technology provider, will be conducting a comprehensive, full-day Dental CAD/CAM training session Nov. 15 at Roland's Irvine corporate headquarters. The training will provide an overview of how digital dental technologies are transforming the dental industry, while also familiarizing attendees with the advanced technology, software and milling equipment dental labs need to deliver custom prosthetic production with speed, precision and economy.

Led by CIMsystem Mechanical Engineer Luigi Fanin, the course is designed to teach attendees how to navigate the digital dental process and CAD/CAM software, use the CAM system to mill everything from crowns to implant bridges, select the right CAD settings for milling, and choose the best tools and materials for the job. In addition to gaining key takeaways for success in the digital age, participants will earn four CDT credits for attending.

According to Brian Brooks, Roland's product manager for 3D-milling and scanning products, the upcoming training is an ideal opportunity for dental lab professionals to learn about the latest techniques and technologies available for advancing their skills and services. "We'll show them how incorporating these methods, and an amazing device like Roland's DWX-50 5-axis dental milling machine, into their practices can dramatically increase quality, efficiency and cost-effectiveness," said Brooks.

For more details on the upcoming CAD/CAM for Dental Labs training, or to register online, visit the [information/registration page](#) at the Roland DGA website.

The CAD/CAM dental training conducted by Roland DGA and CIMsystem will include an overview on the capabilities and operation of Roland's advanced DWX-50 Dental Milling Machine.

About Roland DGA Corp.

Headquartered in Irvine, California, Roland DGA Corp. serves as the US-based marketing, distribution and sales arm of Roland DG Corp. in Hamamatsu, Japan. Celebrating 30 years of innovation, Roland provides business-critical solutions every day to professionals across the sign, grand-format, sublimation, UV inkjet, digital graphics, vehicle graphics, fine art, dental, photography, packaging, label, engraving, and 3D modeling industries. Roland DGA is ISO 9001:2008 certified, and Roland DG is ISO 9001:2008 and 14001:2004 certified.

About CIMsystem

CIMsystem is a leading CAD/CAM technology provider for the 3D and Dental market with highly regarded software solutions such as SUM3D and Rhinoceros. Since the company's establishment in 1999 in Milan, CIMsystem has grown to be a leader in CAD/CAM solutions with a worldwide technical and sales partner network.
