### SUM3D CAM SYSTEM

#### **Exhibitor: CIMsystem SRL**

SUM3D Dental is a simple, complete open CAM system from CIMSISTEM SRL suitable for any material and any standard file. The graphic interface is intuitive and all libraries are customizable. Tool paths, strategies and offsets are optimized for a wide range of milling solutions. Other time- and cost-saving features are: automatic management of stocks, implants, abutments, interlock, undercuts and holes; creation of prep lines, pins and connectors; material optimization and nesting; and collision check, statistics and reporting.
