Computer Integrated Manufacturing

Innovative **CAD/CAM** Solutions

Drive the change

Operating since 1994, we are proud to export the "Made in Italy" excellence across the globe, being digital innovators for the medical, orthodontics, mechanical and mould business sectors.

INDUSTRIAL | DENTAL

We provide our customers with **top-level software**, as well as additional core services like product **assistance** and **training**, to guarantee the best return on investment on your software and equipment purchase.

Decades of experience

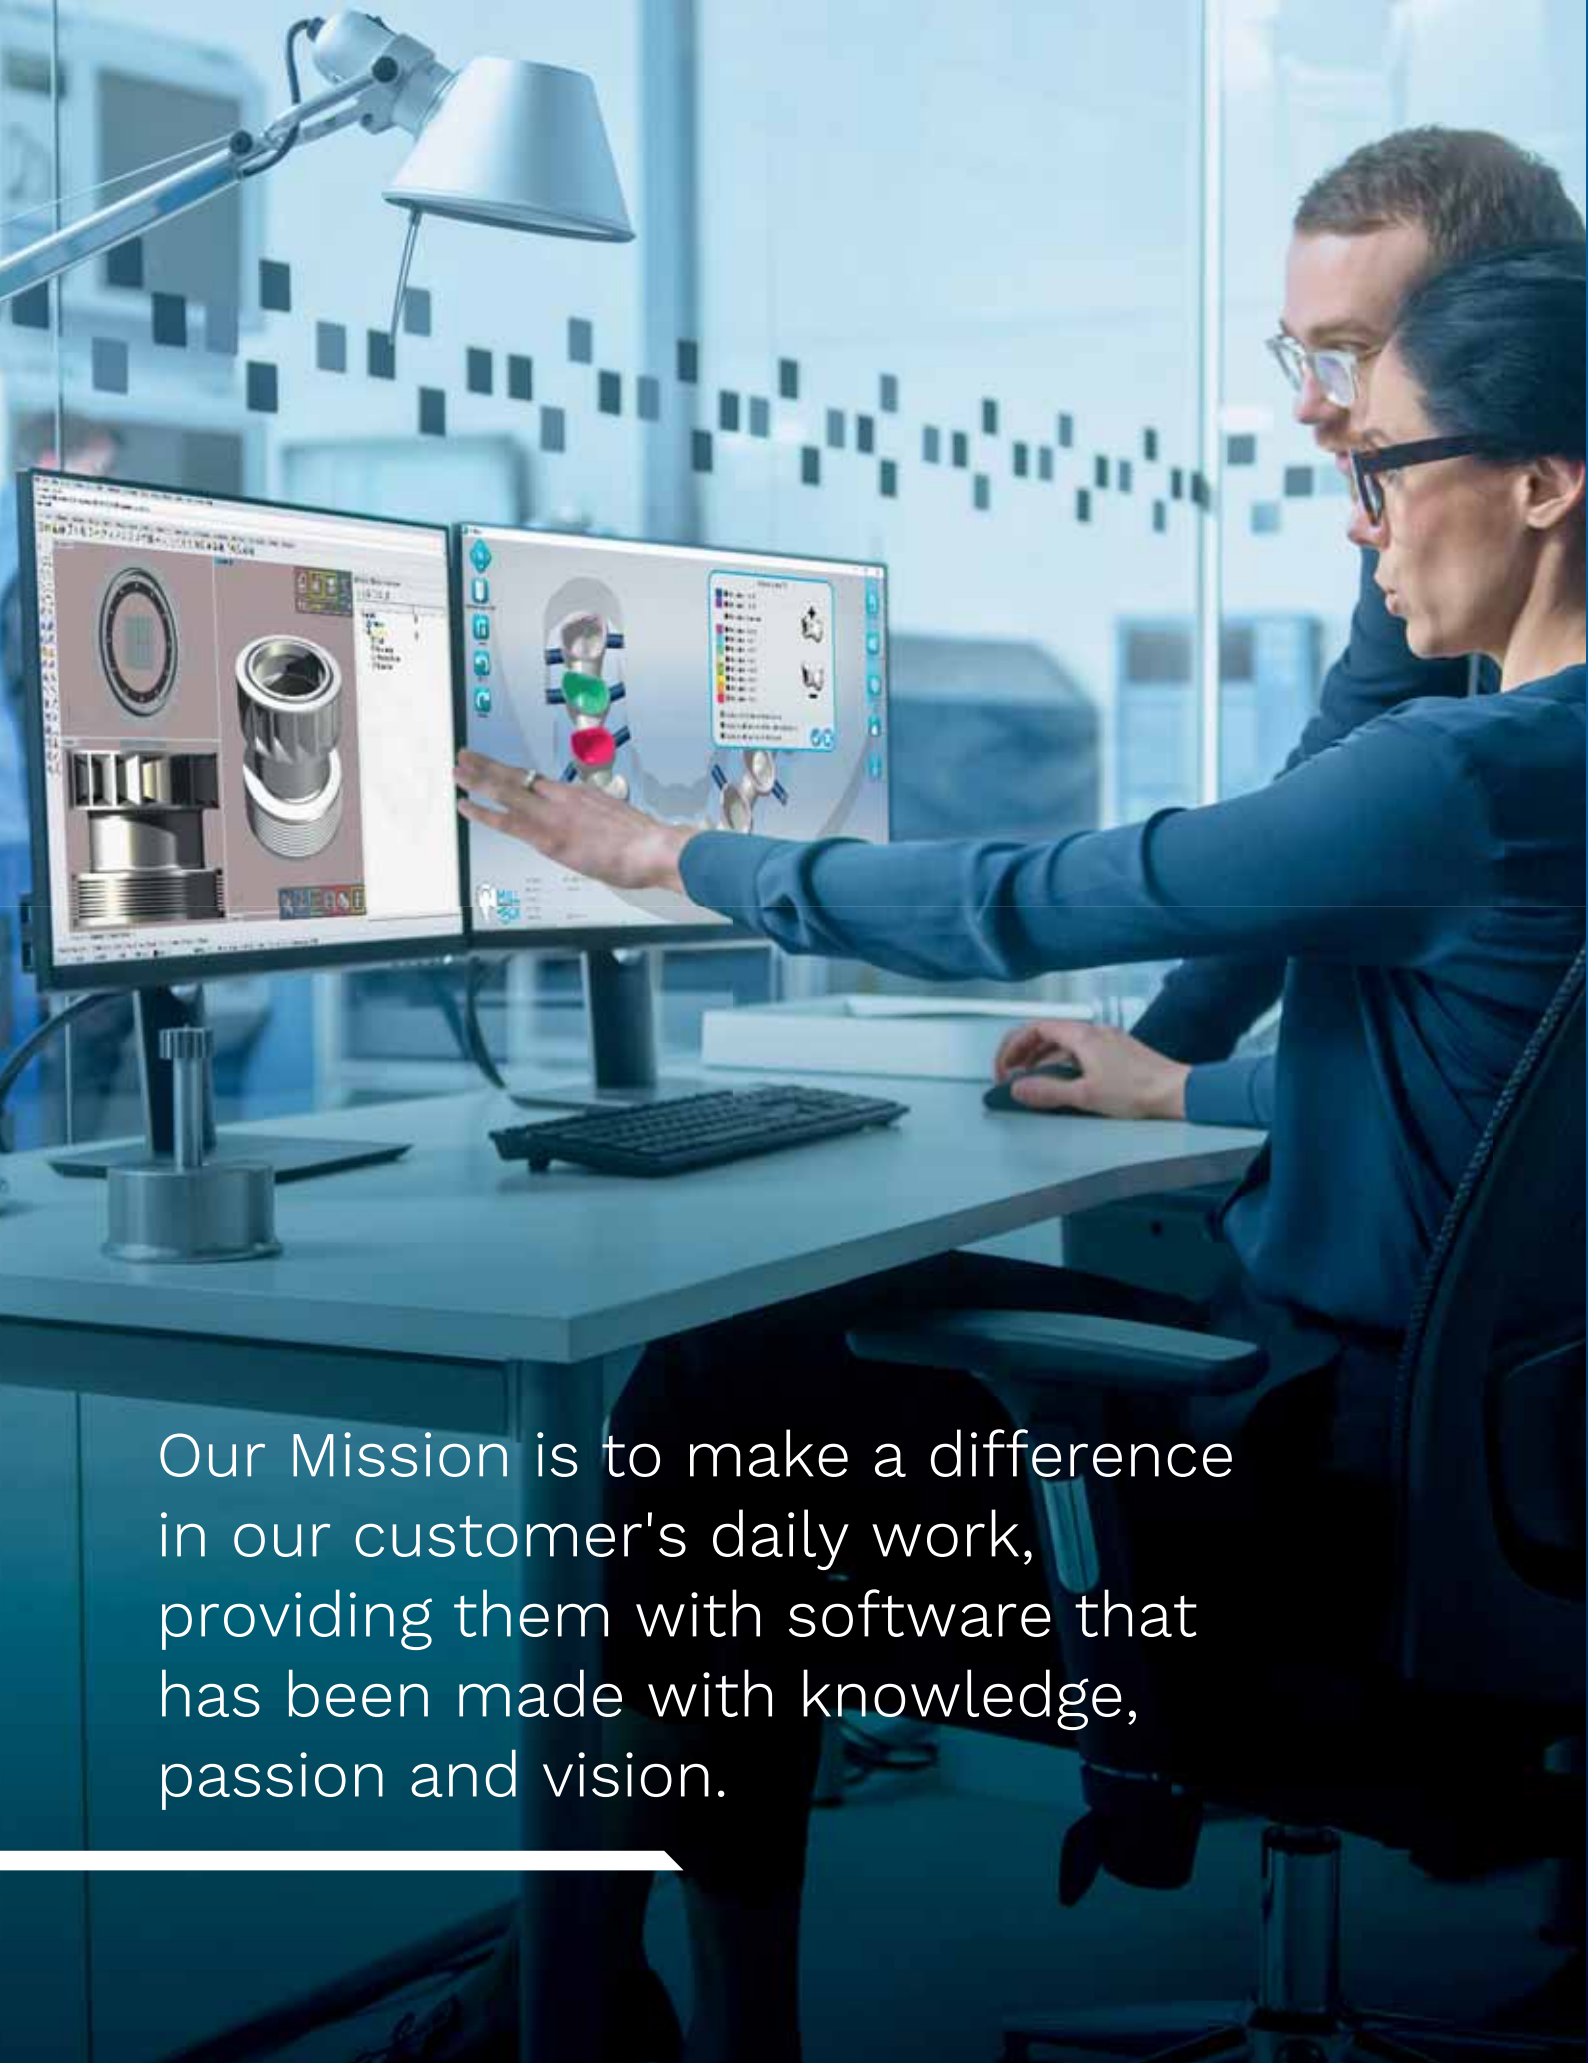

90 employees

7 sites worldwide

More than **100** global distributors

25.000 happy customers

| MISSION

Our Mission is to make a difference in our customer's daily work, providing them with software that has been made with knowledge, passion and vision.

Competitiveness

What makes us truly competitive is our ability to tailor our solutions to specific customer needs. Our products run perfectly, regardless of the machine type, material, or tool used, and are continuously updated to provide top performance results that exceed our customers requirements.

Innovation

Having a permanent eye on the market development enables us to anticipate customers' requests while providing cutting-edge solutions that effectively respond to contemporary innovations and trends. Our technology is heavily based on Artificial Intelligence, system integration, quality compliance and pursues the ultimate goal of simplifying operators' tasks while optimizing any resource.

Motivation

Motivation is what really makes us an irreplaceable partner. We can count on great teams of international experts who work side-by-side with our customers, serving as consultants, trainees and technicians to ensure the best usage of our integrated solutions.

CAD/CAM Solutions for milling centers, dental labs, and dentists.

We develop multiple softwares that are able to support operators throughout the entire digital workflow from project development to finishing and printing, from file management to quality checks and machine/tool usage optimization.

MillBox

MillBox is a premier dental CAM Suite that is capable of driving any milling machine to create any restoration type with any tool, in any material.

Pyramis

3D printing management software that is automated, easy-to-use, and affordable. It is compatible with the most common CAD systems and the most used printing technologies.

Make&Mill

Sintering and milling hybrid solution that combines the best aspects of both additive and subtractive technology all in one. Makes&Mill ensures perfect milling for any kind of sample.

Exocad

Authorized Reseller for the Italian market.

Customized software for CNC machines and robots

We are also at the forefront of mechanical and industrial CAD/CAM software development for three-dimensional CAD and CAM systems, Reverse Engineering solutions, for data transmission, Rhinoceros™ plug-ins and products specifically designed for the industrial sector. Whether you work in design, fashion, mould, mechanics, or medical, we make sure you get the best machining results with our CAM solutions.

RhinoNC

RhinoNC

CAM 3D integrated into Rhinoceros for CNC machines and robots. Able to perform toolpaths from 2.5 to 5 axis in continuous.

CAMWorks®

CAMWorks

CAM 3D integrated in SolidWorks® and Solid Edge®. Authorized Reseller for the Italian market.

SUM3D

CAM 3D for CNC machines and robots, able to perform toolpaths from 2.5 to 5 axis in continuous.

Rhinoceros

Authorized Reseller.

Rhino Plugin

Plugins fitting with Rhinoceros.
